

Ameridrives Couplings is a leading international manufacturer of mechanical power transmission products. The company began manufacturing in 1928, and patented the Amerigear fully crowned tooth coupling in the early 1950s.

We offer a complete line of coupling products including Amerigear gear couplings and spindles, Ameriflex diaphragm couplings, and universal joints.

Amerigear Couplings

Amerigear couplings are fully-crowned gear teeth, provide operational benefits including maximum load-carrying capacity with minimum size, maximum reliability and long life.

SM Series Gear Spindle

SM Series gear spindles are designed for medium to high torque mill applications which require rugged strength. Units can operate at high misalignment angles.

Americardan® Universal Joint

Americardan Universal Joints are designed for operation at high misalignment angles up to 15°. Bearing and seal design resist lubrication loss and contamination. Ideal for use in severe atmospheric conditions.

Turboflex GC® Disc Couplings

GC Series couplings feature unitized, straight-sided flexible discs for ease of installation. Up-to-date design targeted specifically for heavy industrial applications.

Ameriflex® Diaphragm Couplings

Unique diaphragm design permits high-torque density and low weight.

- API-671 compliant
- Best for high axial travel requirements

Ameridisc® Disc Couplings

Optimized disc profile for even stress distribution. Proprietary disc coating to prevent fretting and corrosion.

- API-671 compliant
- Best for reduced moment applications
