

Safety Hinge Switches

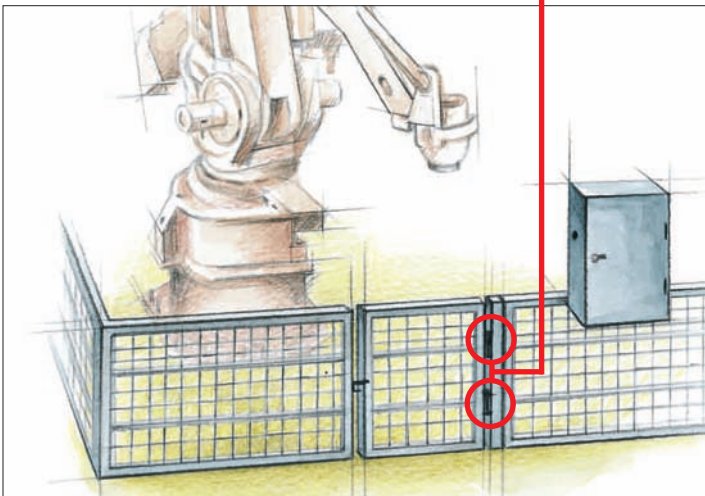

for machinery guards and safety fence doors

Integrated safety switches and load bearing hinges for industrial applications

Designed to facilitate mounting onto aluminum profiles, steel or plastic doors, the slim profile of SafeLock SHS hinge switches, even when fully closed, allows the hinge to be easily mounted where space is confined. Excellent tamper protection is achieved with an internally-mounted safety contact. These hinge switches provide safe, flexible and reliable performance.

- Suitable for category 4 systems
- 0-180° hinge operation angle
- Cast zinc alloy body
- Load bearing up to 750N axially; 1000N radially
- AC/DC to 250V or 60V DC versions available

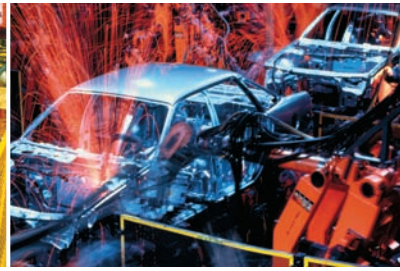

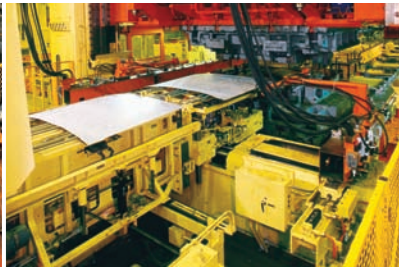

(on selected models)

Safety Hinge Switches

True Category 4

- True electrical redundancy
- True mechanical redundant safety
- Avoids mechanical common mode failure

Warner Electric has many years of experience in applying sensors in motion control applications. Warner Electric's broad range of innovative and technologically advanced product range offers our customers the exact solution to satisfy their sensing applications.

Non-Contact Sensors

- Photoelectric Sensors
- Ultrasonic Sensors
- Inductive Proximity Sensors
- Capacitive Sensors
- Magnetic Sensors

Industrial Switches

- Limit Switches
- Foot Switches
- Cable Pull Switches

Safety Technology Products

- Safety Interlocks
- Cable Pull Switches
- Coded Magnetic Monitoring Systems
